Jordan Matter

Global Citizenship

I believe global citizenship means that one is aware of various issues within the world, while understanding their place in the world. I chose to use pointe dancers for this project to demonstrate that there is more behind the dancer than just dance rehearsals and performances. Friendships are revealed in the first image while the second image holds a powerful message of service outside of dancing. Both images exhibit that once a dream is achieved one should give back to their local or dance communities who have been supportive throughout the process.
