

**Research Question:**How can after school activities stimulate parent involvement?

**What survey question will you use to operationalize your dependent variable?**

“What is your race/ethnicity?”

1. Latino/Hispanic
2. White (Non-Hispanic)
3. Black or African American
4. Asian
5. Pacific Islander
6. Native American
7. Middle Eastern
8. Muliracial
9. Other
10. Prefer not to answer

**What survey question will you use to operationalize your independent variable?**

On a scale of 0-10 how much did your family enjoy this activity?

(circle one) (0 being the lowest 10 being the highest)

0 1 2 3 4 5 6 7 8 9 10

**Using information from class, explain why these are good/well written questions.**

These questions are good/well written questions because they highlight all aspects of what a good question should entail. The questions are positive, non-leading and easy to answer with scales going from 0 to 10. Both questions operationalize the dependent and independent variable in a way that conveys the research subject appropriately.

**Discuss best practices for survey research:**

This survey will best represent the respondents in a way that will make the data gathered easily understandable and transferable to the purpose of this research study. I chose these

questions to best target the independent and dependent variables of the research study which are the basis of the project. Both questions are easily understandable and can be considered void of any confusion when answered by the respondents.
