May 20, 2017

Roy Williams  
1545 Red Level Road  
Terrapin, MD 24592

Dear Mr. Williams:

Thank you for your letter. The success of our city relies on active members of the community working with the elected officials to point out and provide solutions to prominent issues.

We recognize that you have requested that the Terrapin Public Works Department place fixing three potholes on Red Level Road as their first priority.

The flooding of the Dan River on May 12, 2017, caused a complete stop of all businesses in the Riverdale Area, such as: Sheetz, Taco Bell, Ed's Car Dealership, and Mary's Furniture. Our local community college was also forced to cancel classes for that week as students from the Cluster Springs, Tuberville, and Alton area could not access the roads. Because of the inconveniences this flood caused, the Public Works Department is currently working tirelessly with the Sanitation Department to construct a self-closing flood barrier that is designed to protect our citizens and their property from flooding.

We understand how inconvenient potholes can be. Your letter stated that you have previously worked in the Public Works Department and understand how to fix potholes. Terrapin would certainly benefit from a knowledgeable volunteer group working to make our city a more convenient place for drivers.

Our city has grown in recent years, becoming one of Maryland's most populous cities! We hope to make decisions that will benefit all citizens in this beautiful city.

Yours sincerely,

Jeff Capel  
Terrapin City Councilor
