# Translating Treasures

Transforming  
communication  
one trinket at a time

## About Us

Translating Treasures utilizes the latest voice-recognition technology to facilitate communication.

With the help of our talented jewelry design team and state of the art software, we have developed pieces that are not only beautiful, but that serve a purpose.

A small speaker and minuscule microphone equipped with the ability to translate audio is inserted into each gemstone. The gemstone listens, and produces the translated version of audible dialogue!

Jewelry that sparks communication, connection, and compliments
