

Grocery Genie

FOR IMMEDIATE RELEASE – April 2, 2018

Free-floating grocery container announced

San Francisco – A new device was released yesterday that will aide shoppers in the transportation of bagged groceries through free-floating, hands-free technology.

“Grocery shopping has never been more enjoyable!” said Sara Wright, creator and owner of Grocery Genie, who developed the product from her California home.

The Grocery Genie is a free-floating drone which holds up to 100 pounds of groceries with special compartments designed to accommodate even the most fragile products, such as egg cartons and milk containers. The Grocery Genie smartphone app allows customers to control the device from their phones using GPS technology.

“Grocery shopping used to be such a chore, but now I actually look forward to shopping,” said Michelle Bryant, Grocery Genie product tester. “Instead of relying on my kids to help bring in groceries, I can now do it all in one trip!” said Bryant.

Grocery Genie is committed to customer satisfaction and is offering a one-month free trial to the first 100 customers who order on www.grocerygenie.com. Start this free trial today by using the code GROCERY100.
