

Future Noel,

I assume that you're reading this near the end of your senior year, and I hope all is well. Hopefully, you've found a fitting school to pursue your graduate degree. Maybe you're sticking with the original plan of getting your masters in exercise physiology, but who knows, you may have found something even better by then. I expect that you'll be graduating with honors, hopefully with a GPA of 3.75 or better.

After four years of Division 1 Cross Country, I trust that you'll be adequately prepared to kick off your marathon and ultramarathon running career. If all goes to plan, you may even be chasing the elusive Olympic Trials qualifying standards in a few years. Never forget where you started and the years of determination that it took.

Hopefully, the campus photographer job that Professor Simple mentioned worked out and is acting as a stepping stone into your professional photography career. Will you find a spot on a magazine staff, or will you get your start with one of the visiting photographers that come to speak in Bedford Hall? Time will tell.

Sincerely,

Noel of 2019
