John Allen
Councilor
Culpeper County City Council
8558 Conner Avenue
Culpeper, Va 22701

Dear Mr. Allen:

Subject: Pothole repair around town

In the past several months, there have been many car accidents that have happened due to these potholes. The number is increasing everyday and it is just getting worse. Many cars are being damaged because of these potholes and they are causing accidents because people try to go around them.

This issue has been going on for too long. There are many cars that are being damaged due to these potholes. On average there are about 20 cars a week that are being damaged and there are about 5 accidents a day caused from these potholes. There are many people who go about their day, either headed to work, going to appointments, or just running errands and they either get a flat tire, get into an accident, or have some other damage happen to their car. This causes them to either be late to wherever they are going or they have to fork out money they might not have to pay for the damages of their car. There are some people who also get seriously injured from these accidents that occur from these potholes. By fixing these potholes you can help prevent all these issues that are taking place.

We are aware that this is a lot to ask from you all, because you are so busy. But we are also seeing so much happen through our town that we feel something needs to be done. By helping us out there will be less accidents and less damage happening to cars. You will also be saving people from serious injuries and helping those who don't always have the extra money to be fixing their cars all the time. This will be a big help to our community and we will forever be grateful.

On behalf of the people of the community, we would like to thank you for taking time out of your day to read this and taking our concerns into consideration. I hope to talk to you very soon.

Yours Sincerely,

Taryn Pullen
