Silk n' Smooth

Sanfield Beauty Co.

Richmond, VA

We want to create an easy way for women to shave their legs. We know the everyday struggle of shaving legs. The Silk n' Smooth is invented to make shaving your legs less of a hassle. To use this device, you put the strap around your ankle. You then have to push and hold down the green button until it stops blinking. The device will begin to move up your leg while it is shaving. There are sensors attached to the device that will stop once it has completed shaving your leg. The material for this device is elastic so it can

stretch to shave around your ankle to your thigh. The device has a lotion like substance around the top of it that acts as a shaving cream that aids in the shaving process. It takes the average women five minutes to shave her legs. With our product, we have narrowed that time down to one minute per leg! We wanted to create the best product we could to make the struggle of shaving easier!

Discover effortlessly smooth, hair free legs with the Silk n' Smooth, as it delicately contours to the natural curves of your legs. Save valuable time as you get ready for your day and allow the Silk n' Smooth to do the work for you. Achieve a pain-free wet or dry shave with no nicks or cuts to slow you down, that leaves you with silky smooth results and no irritation. Sanfield Beauty Co.'s customers have described the Silk n' Smooth as life-changing, and with the long lasting effects and ease of use, you'll want to say goodbye to manual shaving forever.
