

The Deep End

November 13, 2019--FOR IMMEDIATE RELEASE

The Deep End celebrates first successful month of business!

LOS ANGELES - The newly opened Deep End restaurant promises to offer a new dining experience for guests. The restaurant, located 2 miles off the coast of Santa Catalina Island, California, is over 20 fathoms below sea level. The newly opened restaurant just reached their first month's opening anniversary. "We had high hopes, but the customer turnout has blown our expectations out of the water; excuse the pun," said the owner, Arthur Francis, when asked about the recent success.

Customers with reservations can park their cars on the coast of Los Angeles, where they will then board a 50-passenger yacht that carries them to a water elevator located off the coast of Santa Catalina Island. The elevator will then descend to a restaurant where they will enjoy luxurious dining pleasures inches away from one of the world's largest kelp forests.

"After eating at The Deep End, I never want to eat at any other seafood restaurant ever again!" said Stephanie (25) after her first visit to The Deep End.

The menu includes high-end seafood items such as Shrimp Scampi, Crab Linguine Alfredo, and Lobster Bisque, all served fresh by 5-star chefs. As The Deep End is located within a hot-spot for scuba diving, diners can look out the glass windows lining the restaurant's walls and see indigenous marine life such as the Pacific Octopus, Angel Shark, Yellowfish Tuna, or Garibaldi fish.

Due to the nature of the restaurant, a reservation is required to dine. Once booked, customers can visit the company-owned water elevator where they will be taken down to the restaurant. The restaurant guarantees a pleasant dining experience, or they will offer a full refund for the visit. *The Deep End* is currently offering 10% off your first visit when you use code "DEEPEND38" on their website www.deependdining.com, where customers can book a reservation
