WHAT IT OFFERS

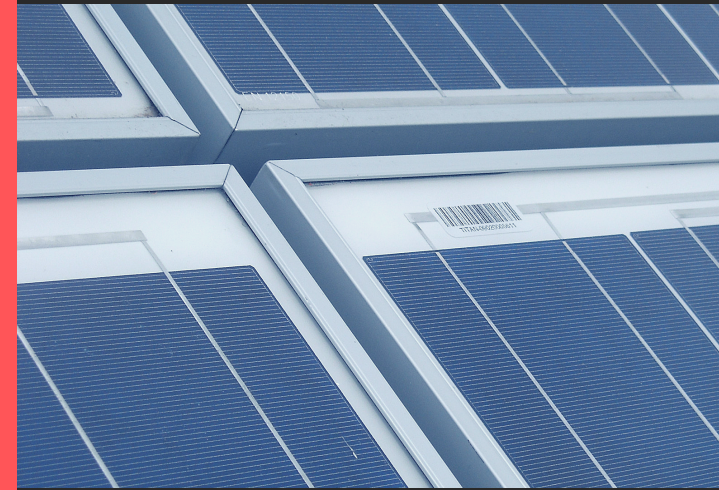

This phone has a built in solar based battery that will power your phone after a traditional charge depletes. When the traditional charge depletes, the solar battery will keep your phone going for 24 hours.

This new phone, the Neptune 1, has been developed by the top environmentally friendly engineers. The Neptune 1 has been in the works since 2010, said the vice-president of engineering Michael Scott

THIS PHONE CAN GO WITH YOU ANYWHERE- CAMPING, FISHING, AND TRAVELING. AS LONG AS YOU CAN SEE THE SUN, YOUR PHONE WILL HAVE UNLIMITED BATTERY.”

-JULIA SMITH, CEO

ARE YOU READY?

This product will ensure a good experience with your power source and provide great service wherever you go. The phone comes with earbuds, a charger, screen protector, and the charger doubles as a flashlight. There will be two different styles of the phone: regular and extra large. The phone will come in five different colors : gold, blue, red, white, and black. The Neptune 1 will be equipped with solar powered panels on the back of the phone, while still maintaining the traditional charging port.
