

## What our customers say:

"I own a small business in the city. No matter how many times we changed the locks and enhanced our security, we still experienced break-ins. I've come to accept this inevitability being in a high-crime city, but I can now sleep easy at night knowing I have the SafeSafe. All my valuables are simply hidden in plain sight."

-Jerry Lipton,  
Business Owner

"When I went through my divorce several years ago, it was quite messy. My ex-husband broke into my apartment while I was at work and took some of my personal belongings without my knowledge. That's when I turned to SafeSafe. It has a brilliant technological design and blends right into the room! Now, I never have to worry again because my possessions are protected."

-Sharon Wilmen,  
Accountant

**PROTECT WHAT'S  
IMPORTANT TO YOU**

SafeSafe, LLC  
Richmond, VA

## **Our Mission:**

*Protecting what's important to our customers, with the best resources available.*

### **What is the SafeSafe?**

The SafeSafe ordinary safe. It uses nano-bot technology developed by the United States Army to disguise its location. It blends into any space you place it in and is guaranteed to keep your jewelry, photographs, keepsakes, and important documents safe!

### **How it works:**

The SafeSafe is equipped with high-resolution cameras on each surface that record the surrounding environment. Those images are projected onto the sides of the safe, which acts like a screen. A picture taken in the back will display on the front, and vice versa. No matter where you move your SafeSafe, the projected images will adapt, providing a seamless disguise!

### **Special features:**

- choice of fingerprint or numerical code access
- connects to your phone to show exact location and alert you of unauthorized access
- cameras take photograph of intruder when unauthorized access is suspected
  - fire and water proof
- made from high-quality steel that will never break or tarnish

### **Why should you be concerned about the safety of your safe?**

- 2.5 million burglaries per year in the U.S., 66% which are home break-ins
  - 65% of home burglaries occur in between the hours of 6 AM and 6 PM while people are at work
- The average loss in a typical burglary is \$2,230!
- A burglary occurs every 15 seconds

Break-ins and theft are an inevitable reality of the world we live in today.

Thanks to the SafeSafe, you no longer have to worry. Don't take the risk of losing your irreplaceable and valuable items. Protect yourself with the SafeSafe today!
