January 12, 2018

Joe Wilcox
Farmville Councilor
3334 High Street
Farmville, VA 23901

Dear Councilor Wilcox:

Over the past year, our neighborhood, Farmville Creek, has been the place of more than 15 vehicular accidents. As a result of the number of accidents, we have had 3 fatalities.

The accidents began in early January 2017 when a few potholes began to show. As the year went on and the potholes got bigger and deeper, the potholes had a huge affect on the vehicles. While I was taking my dog for a walk, I witnessed a woman hit a pothole and her two front tires completely detached from the vehicle, while the tires went flying into another car. The potholes are dangerous enough to make a car collapse.

We are asking that you implement the construction company to repair the many potholes on High Street immediately. The residents of Farmville Creek are asking that as the councilor, you can ensure the construction will happen as soon as possible to prevent further accidents. As the Farmville Creek Neighborhood Committee, we are willing to donate half of the funds in order to start with construction soon.

We are mindful that we are requesting a great measure of you, but the benefits are worth it. Once the potholes are repaired, there will be no accidents on High Street related to potholes. The residents of Farmville Creek will be able to take the normal route out of the neighborhood and not have to go five minutes out of their way to avoid High Street.

Please process our request by February 6, 2018 so we can send a check for half of the funds. Let us know how much construction will cost so we can plan fundraising events to raise half of the funds we are donating.

On behalf of the Farmville Creek Neighborhood Committee, we thank you for your time and support.

Yours sincerely,
Alice Grey
