

Table 1.

Independent samples t test of parent involvement by income.

	Mean Parent Involvement	T	DF
Low income	9.0	-0.47617 ***	49.86
High income	9.2		

Note. $P < .05^*$, $p < .01^{**}$, $p < .001^{***}$

The mean parent involvement scores for low-income households were 9.0 and the mean parent involvement for high income households was 9.2. The t test value was 3.1396*** and it is significant at the .001 level. Therefore the mean parent involvement is significantly different.
