

Delaney McMahon – Academic Personal Statement

I am a soon to be biology graduate from Longwood University and would love the opportunity to apply my competitive skills to your laboratory. I have spent the past two years in a behavioral neuroscience lab as an undergraduate research assistant and have also gained many skills throughout the variety of courses I completed. This position will apply my passion for research by performing hands-on laboratory work to make a difference in the research community and potential lives in the future. I am a hard-worker that is highly adaptable to change and my diverse skill set including behavior analyses, neuron quantification, cryosection, gel electrophoresis, PCR, and statistics will make a difference at your company.
