BioAgilytix Labs  
2300 Englert Drive  
Durham, North Carolina

To Whomever it may concern,

I was excited to see your opening for an Analyst (GMP), and I hope to be invited for an interview.

My background includes working in a collaborative group at local Peruvian restaurants around my area. I have experience leading as I was a leading waiter at these restaurants. I also follow directions very well. My most recent experience as a Pharmacy Technician taught me how to be as precise as possible when it comes to doing my job. I was in charge of running a dispensing machine that would dispense medication for 2 retirement homes weekly and 4 retirement homes monthly. I was the only person on the machine so I had to learn to be independent and look over my work to not miss any missing medication or over-dispensing.

Previously, I have been doing research with a professor at Longwood University. Our research has to do with Synthetic Biology. This research has also taught me how to work independently and be very punctual. The techniques that I have gained from this experience have to do with DNA purification and PCR. Another research opportunity I have had in the past is learning how to use a Scanning Electron Microscope to identify unique features of insects to classify them. In addition to this experience, I have experience in being a Busboy and headwaiter at local restaurants. This experience has taught me how to handle escalating situations and how to work in customer service.

I also bring to the table strong computer proficiencies in MS Word, MS Excel, and R database applications and protein modeling software such as; Plymol, Jmol, Rasmol, and Swiss-Prot.

I am confident that I can do this job very well and can display the communication and problem-solving skills that you are seeking. Feel free to call me at 571-331-3258 (cell) to arrange an interview. Thank you for your time—I look forward to learning more about this opportunity!

Sincerely,

Diego Sifuentes
